DETAILED ACTION

1. The examiner acknowledges the argument filed January 17, 2008. Claims 14-30 are pending.
2. In view of the argument filed January 17, 2008, the rejection of Claims 25-27 under 35 U.S.C. 102(b) as being anticipated by Bauers et al, [Macromolecules, 36, 6711-6715(2003)], is withdrawn. Further, the rejection of Claims 14-24, 28-30 under 35 U.S.C. 103(a) as being unpatentable over Bauers et al. [Macromolecules, 36, 6711-6715(2003)] in view of Ostoja-Starzewski et al. (US 5,686,542), is withdrawn.

Claim Rejections - 35 USC § 112

3. Claims 28-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Although applicants' specification (page 7, line 26-37; page 20, line 29 to col. 22, line 10) discloses the suitability of the emulsions prepared by the process being claimed in other applications, the specification does not adequately provide support for the processes being claimed in claims 29-30.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thornton*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 14-30 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-8, 11-14 of copending Application No. 10/579,098, because both applications are fully encompassing each other. Applicants must recognize that both applications are claiming inventions that share the substantially identical inventive scope, other than the differences in rearrangement of the claimed features.

This is a provisional obviousness-type double patenting rejection.

Response to Arguments

Applicant's arguments filed January 17, 2008 have been fully considered but they are not persuasive. Applicants argue that if a terminal disclaimer should be filed, it should be filed in copending Application No. 10/579,098. However, the examiner has to maintain the ODP rejection set forth, since neither application has any terminal disclaimer filed at the time of instant office action.
